

Application Serial No. 10/048,114
Amendment After Final dated January 23, 2009
Reply to Final Office Action dated October 17, 2008

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-9 (canceled)

Claim 10 (previously presented): The process according to claim 15, wherein the information data are transmitted to the data-preparing device over a device engaged between the data-requesting device and the data-preparing device.

Claims 11-14 (canceled)

Claim 15 (currently amended): A process for transferring data from a data-preparing device to a data-requesting device, comprising:

the data-requesting device requests, over a network, requested data to be transmitted to it by the data-preparing device;

the data-requesting device transmits to the data-preparing device over the network information data about the capabilities of the data-requesting device, said information data transmitted by the data-requesting device including a list of usable display formats for the data-requesting device, said list comprising a plurality of display formats;

the data-preparing device then, according to availability at the data-preparing device, automatically selects the best-suited a single display format from the list of usable display formats transmitted by the data-requesting device, said list comprising a plurality of display formats;

the requested data being stored in a central data bank of the data-preparing device;

a formatting device formats, on call, the requested data into the selected display format; and

the data-preparing device then transmits the requested data over the network to the data-requesting device in the selected display format.

Claim 16 (currently amended): A process for transferring data from a data-preparing device to a data-requesting device, comprising:

the data-requesting device requests, over a network, requested data to be transmitted to it by the data-preparing device wherein the requested data includes textual data contained in graphics data;

the data-requesting device transmits to the data-preparing device over the network information data about the capabilities of the data-requesting device, said information data transmitted by the data-requesting device including a list of usable display formats for the data-requesting device, said list comprising a plurality of display formats;

the data-preparing device then, according to availability at the data-preparing device, automatically selects a single display format from the list of usable display formats transmitted by the data-requesting device;

the requested data being stored in a central data bank of the data-preparing device;

a formatting device formats, on call, the requested data into the selected display format the selected display format being mere textual format; and

the data-preparing device then transmits the requested data over the network to the data-requesting device in the selected display textual format.
